THRU : Chief, Industrial Division, OHR
Acting Chief, Electrical Equipment Branch, D/I, OHR

Modification of Requirement 6E-237

1. On 24 September 1957, a discussion was held between representatives of NSA/GENS-1 and Mr. [redacted] of OHR/D/I, concerning the details of APOIN-3 requirement 1A9-(3A-10)-(203)-57, concurred in and supported by CIA 6E-237.

2. As a result of the discussion the following points were brought out:

a. The majority of the available material bearing on this requirement has been published and is available to consumer analysts.

b. Publication of new information, to the extent that it contributes to COL 2 and COL 3, is being processed on a priority basis as it is received in GENS-1.

c. It was jointly decided that the specific nature of this requirement, which requests an overall report along explicitly stated lines, is inappropriate at this time.

3. These points were covered in a separate conversation with representatives of APOIN-3, CIA, and NSA at a special center meeting of the EIC Subcommittee on Electronics and Telecommunications.

4. It is requested, therefore, that the referenced requirement be modified in such a manner that it will constitute only a general guideline for publication of new material as it becomes available.
